

Asia's pollution exodus, firms struggle to **woo** top talent

From smog breaks to pollution bonuses, Asia's businesses are promising increasingly inventive **perks** in a desperate bid to lure executives to a region where toxic air **engulfs** major cities for much of the year.

woo 追求; 恳求

perk 补贴; 额外收入

engulf 吞没; 吞食

Health concerns are putting off those initially attracted by Asia's growing economic opportunities, experts warn, so firms are struggling to recruit — and retain — people with the expertise they need.

According to the United Nations Environment Programme, some 92 percent of people in the Asia-Pacific region are exposed to levels of air pollution that pose a significant risk to health.

This means that on top of large salaries, businesses are having to offer extra **incentives**. These include paying for smog breaks every few months, or allowing non-traditional working arrangements so people can commute from less polluted areas, says Lee Quane, Asia director for consultancy ECA International.

incentive 刺激; 激励

At "a location with a higher level of pollution, you're likely to see us recommend **allowances** of anywhere between 10 to 20 percent of the person's base salary," he says.

allowance 津贴; 零用钱

This estimate, derived from a rating system his firm uses to help companies decide appropriate financial compensation for relocation, would also incorporate factors such as crime rates and access to services, he adds.

India has one of the world's fastest growing economies, making it an appealing career option, but it is also home to seven of the most polluted cities, according to a recent report by Greenpeace and IQ Air Visual.

"All senior executives want to have India experience on their CVs. There is however, a fear of pollution related health issues, " says Atul Vohra, managing partner of Transearch, a global recruitment firm.
